

Chicken Zonula occludens ELISA Kit

Chicken Zonula occludens ELISA Kit

CATALOG #
AAA244413

REACTIVITY
Chicken

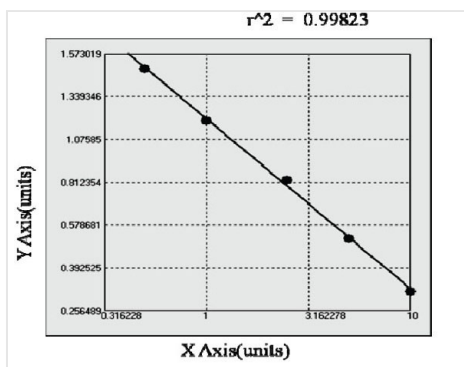

PRODUCT SYNONYMS

Zonula occludens; Chicken Zonula occludens ELISA Kit; Zonula occludens elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This Zonula occludens ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken Zonula occludens. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Zonula occludens elisa kit

Principle of the assay: Zonula occludens ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-Zonula occludens antibody and an Zonula occludens-HRP conjugate. The assay sample and buffer are incubated together with Zonula occludens-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the Zonula occludens concentration since Zonula occludens from samples and Zonula occludens-HRP conjugate compete for the anti-Zonula occludens antibody binding site. Since the number of sites is limited, as more sites are occupied by Zonula occludens from the sample, fewer sites are left to bind Zonula occludens-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Zonula occludens concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
