

Rat Carboxylesterase 1 ELISA Kit | CES1 elisa kit

Rat Carboxylesterase 1 ELISA Kit

CATALOG #
AAA244658

REACTIVITY
Rat

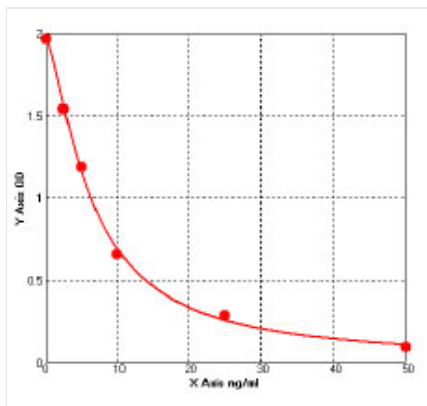

PRODUCT SYNONYMS

Carboxylesterase 1; Rat Carboxylesterase 1 ELISA Kit; CES1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of CES1. No significant cross-reactivity or interference between CES1 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between CES1 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for CES1 elisa kit	Principle of the Assay: CES1 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-CES1 antibody and an CES1-HRP conjugate. The assay sample and buffer are incubated together with CES1-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CES1 concentration since CES1 from samples and CES1-HRP conjugate compete for the anti-CES1 antibody binding site. Since the number of sites is limited, as more sites are occupied by CES1 from the sample, fewer sites are left to bind CES1-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CES1 concentration in each sample is interpolated from this standard curve. Intended Uses: This CES1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat CES1. This ELISA kit for research use only, not for therapeutic or test applications!
---	--

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
