

Monkey anti-TNF-alpha autoantibody ELISA Kit

Monkey anti-TNF-alpha autoantibody ELISA Kit

CATALOG #
AAA244773

REACTIVITY
Monkey

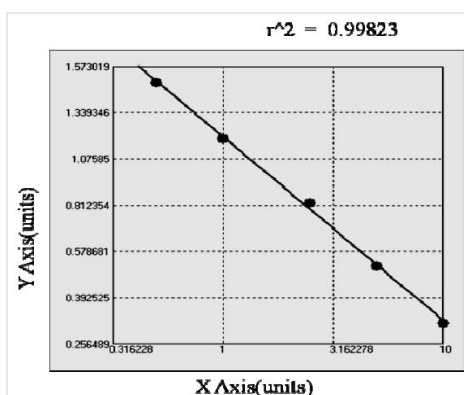

PRODUCT SYNONYMS

anti-TNF-alpha autoantibody; Monkey anti-TNF-alpha autoantibody ELISA Kit; anti-TNF-alpha autoantibody elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This TNFa-Ab ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey TNFa-Ab. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

Principle of the assay: TNFa-Ab ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-TNFa-Ab antibody and an TNFa-Ab-HRP conjugate. The assay sample and buffer are incubated together with TNFa-Ab-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TNFa-Ab concentration since TNFa-Ab from samples and TNFa-Ab-HRP conjugate compete for the anti-TNFa-Ab antibody binding site. Since the number of sites is limited, as more sites are occupied by TNFa-Ab from the sample, fewer sites are left to bind TNFa-Ab-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TNFa-Ab concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
