

Porcine anti-neutrophil antibody, ANA ELISA Kit

Porcine anti-neutrophil antibody, ANA ELISA Kit

CATALOG #
AAA244931

REACTIVITY
Porcine

PRODUCT SYNONYMS

anti-neutrophil antibody; ANA; Porcine anti-neutrophil antibody; ANA ELISA Kit; ANA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Porcine
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

Intended Uses: This ANAb ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Porcine ANAb. This ELISA kit for research use only!

Principle of the Assay||ANAb ELISA kit applies the competitive enzyme immunoassay technique utilizing a neutrophil antigen and an ANAb-HRP conjugate. The assay sample and buffer are incubated together with ANAb-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ANAb concentration since ANAb from samples and ANAb-HRP conjugate compete for the neutrophil antigen binding site. Since the number of sites is limited, as more sites are occupied by ANAb from the sample, fewer sites are left to bind ANAb-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ANAb concentration in each sample is interpolated from this standard curve.

Neuroscience

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
