

parat hyroid hormone receptor ELISA Kit | PTHrP receptor elisa kit

Rat parat hyroid hormone receptor ELISA Kit

CATALOG #
AAA245450

REACTIVITY
Rat

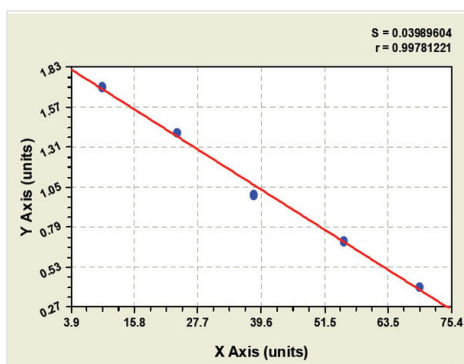

PRODUCT SYNONYMS

parat hyroid hormone receptor; Rat parat hyroid hormone receptor ELISA Kit; PTHrP receptor elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This PTHrPR ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat PTHrPR. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for PTHrP receptor elisa kit

Principle of the assay: PTHrPR ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-PTHrPR antibody and an PTHrPR-HRP conjugate. The assay sample and buffer are incubated together with PTHrPR-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PTHrPR concentration since PTHrPR from samples and PTHrPR-HRP conjugate compete for the anti-PTHrPR antibody binding site. Since the number of sites is limited, as more sites are occupied by PTHrPR from the sample, fewer sites are left to bind PTHrPR-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PTHrPR concentration in each sample is interpolated from this standard curve.
