Mouse Cytochrome P450 2C9 (CYP2C9) ELISA Kit

CATALOG #
AAA245632

REACTIVITY
Mouse

PRODUCT SYNONYMS

Cytochrome P450 2C9 (CYP2C9); Mouse Cytochrome P450 2C9 (CYP2C9) ELISA Kit; CYP2C9 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of CYP2C9. No significant cross-reactivity or interference between CYP2C9 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between CYP2C9 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for CYP2C9 elisa kit	Principle of the Assay: CYP2C9 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-CYP2C9 antibody and an CYP2C9-HRP conjugate. The assay sample and buffer are incubated together with CYP2C9-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CYP2C9 concentration since CYP2C9 from samples and CYP2C9-HRP conjugate compete for the anti-CYP2C9 antibody binding site. Since the number of sites is limited, as more sites are occupied by CYP2C9 from the sample, fewer sites are left to bind CYP2C9-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CYP2C9 concentration in each sample is interpolated from this standard curve. Intended Uses: This CYP2C9 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse CYP2C9. This ELISA kit for research use only, not for therapeutic or test applications!
