

Bovine Alpha-1-acid glycoprotein 1 (ORM1) ELISA Kit | ORM1 elisa kit

Bovine Alpha-1-acid glycoprotein 1 (ORM1) ELISA Kit

CATALOG #
AAA245936

REACTIVITY
Bovine

PRODUCT SYNONYMS

Alpha-1-acid glycoprotein 1 (ORM1); Bovine Alpha-1-acid glycoprotein 1 (ORM1) ELISA Kit; ORM1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Specificity	This assay has high sensitivity and excellent specificity for detection of ORM1. No significant cross-reactivity or interference between ORM1 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between ORM1 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for ORM1 elisa kit	Principle of the Assay: ORM1 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-ORM1 antibody and an ORM1-HRP conjugate. The assay sample and buffer are incubated together with ORM1-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ORM1 concentration since ORM1 from samples and ORM1-HRP conjugate compete for the anti-ORM1 antibody binding site. Since the number of sites is limited, as more sites are occupied by ORM1 from the sample, fewer sites are left to bind ORM1-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ORM1 concentration in each sample is interpolated from this standard curve. Intended Uses: This ORM1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine ORM1. This ELISA kit for research use only, not for therapeutic or test applications!
