

Monkey Creatine kinase B-type (CKB) ELISA Kit | CKB elisa kit

Monkey Creatine kinase B-type (CKB) ELISA Kit

CATALOG #
AAA245978

REACTIVITY
Monkey

PRODUCT SYNONYMS

Creatine kinase B-type (CKB); Monkey Creatine kinase B-type (CKB) ELISA Kit; CKB elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Specificity	This assay has high sensitivity and excellent specificity for detection of CKB. No significant cross-reactivity or interference between CKB and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between CKB and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for CKB elisa kit	Principle of the Assay: CKB ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-CKB antibody and an CKB-HRP conjugate. The assay sample and buffer are incubated together with CKB-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CKB concentration since CKB from samples and CKB-HRP conjugate compete for the anti-CKB antibody binding site. Since the number of sites is limited, as more sites are occupied by CKB from the sample, fewer sites are left to bind CKB-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CKB concentration in each sample is interpolated from this standard curve. Intended Uses: This CKB ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey CKB. This ELISA kit for research use only, not for therapeutic or test applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	21536286
NCBI GeneID	1152
NCBI Accession #	NP_001814.2
NCBI GenBank Nucleotide #	NM_001823.4
Molecular Weight	42,644 Da
NCBI Official Full Name	creatine kinase B-type
NCBI Official Synonym Full Names	creatine kinase, brain
NCBI Official Symbol	CKB
NCBI Official Synonym Symbols	BCK; B-CK; CKBB; HEL-211; HEL-S-29
NCBI Protein Information	creatine kinase B-type; creatine kinase-B; creatine kinase B chain; epididymis luminal protein 211; epididymis secretory protein Li 29
UniProt Protein Name	Creatine kinase B-type
UniProt Gene Name	CKB
UniProt Synonym Gene Names	CKBB
UniProt Entry Name	KCRB_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
