

Human Protein ADP ribosylarginine] hydrolase (ADPRH) ELISA Kit

Human Protein ADP ribosylarginine] hydrolase (ADPRH) ELISA Kit

CATALOG #
AAA245989

REACTIVITY
Human

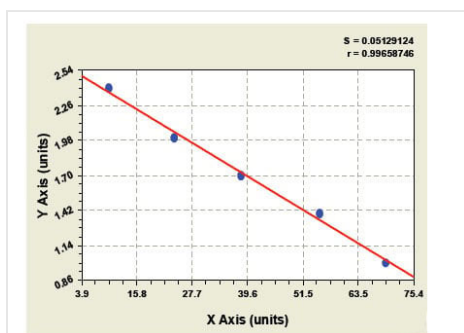

PRODUCT SYNONYMS

Protein ADP ribosylarginine] hydrolase (ADPRH); Human Protein ADP ribosylarginine] hydrolase (ADPRH) ELISA Kit; Protein ADP ribosylarginine] hydrolase (ADPRH) elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	2.5-50ng/mL
Sensitivity	1.0ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

Intended Uses: This ADPRH ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human ADPRH. This ELISA kit for research use only!

Principle of the Assay: ADPRH ELISA kit applies the competitive enzyme immunoassay technique utilizing a Polyclonal anti-ADPRH antibody and an ADPRH-HRP conjugate. The assay sample and buffer are incubated together with ADPRH-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ADPRH concentration since ADPRH from samples and ADPRH-HRP conjugate compete for the anti-ADPRH antibody binding site. Since the number of sites is limited, as more sites are occupied by ADPRH from the sample, fewer sites are left to bind ADPRH-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ADPRH concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
