

Mouse Claudin-7 (CLDN7) ELISA Kit | CLDN7 elisa kit

Mouse Claudin-7 (CLDN7) ELISA Kit

CATALOG #
AAA246091

REACTIVITY
Mouse

PRODUCT SYNONYMS

Claudin-7 (CLDN7); Mouse Claudin-7 (CLDN7) ELISA Kit; CLDN7 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of CLDN-7. No significant cross-reactivity or interference between CLDN-7 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between CLDN-7 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for CLDN7 elisa kit	Principle of the Assay: CLDN-7 ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-CLDN-7 antibody and an CLDN-7-HRP conjugate. The assay sample and buffer are incubated together with CLDN-7-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CLDN-7 concentration since CLDN-7 from samples and CLDN-7-HRP conjugate compete for the anti-CLDN-7 antibody binding site. Since the number of sites is limited, as more sites are occupied by CLDN-7 from the sample, fewer sites are left to bind CLDN-7-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CLDN-7 concentration in each sample is interpolated from this standard curve. Intended Uses: This CLDN-7 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse CLDN-7. This ELISA kit for research use only, not for therapeutic or test applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	297206813
NCBI GeneID	1366
NCBI Accession #	NP_001171952.1
NCBI GenBank Nucleotide #	NM_001185023.1
Molecular Weight	16,837 Da
NCBI Official Full Name	claudin-7 isoform 2
NCBI Official Synonym Full Names	claudin 7
NCBI Official Symbol	CLDN7
NCBI Official Synonym Symbols	CLDN-7; CEPTRL2; CPETRL2; Hs.84359; claudin-1
NCBI Protein Information	claudin-7; clostridium perfringens enterotoxin receptor-like 2
UniProt Protein Name	Claudin-7
UniProt Gene Name	CLDN7
UniProt Synonym Gene Names	CEPTRL2; CPETRL2; CLDN-7
UniProt Entry Name	CLD7_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
