

Human Antibacterial Peptide LL 37 ELISA Kit

Human Antibacterial Peptide LL 37 ELISA Kit

CATALOG #
AAA246103

REACTIVITY
Human

PRODUCT SYNONYMS

Antibacterial Peptide LL 37; Human Antibacterial Peptide LL 37 ELISA Kit; Antibacterial Peptide LL 37 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of LL37. No significant cross-reactivity or interference between LL37 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between LL37 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Antibacterial Peptide LL 37 elisa kit	Principle of the Assay: LL37 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-LL37 antibody and an LL37-HRP conjugate. The assay sample and buffer are incubated together with LL37-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the LL37 concentration since LL37 from samples and LL37-HRP conjugate compete for the anti-LL37 antibody binding site. Since the number of sites is limited, as more sites are occupied by LL37 from the sample, fewer sites are left to bind LL37-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The LL37 concentration in each sample is interpolated from this standard curve. Intended Uses: This LL37 ELISA kit is a 1.5-hour solid-phase ELISA designed for the quantitative determination of Human LL37. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for Antibacterial Peptide LL 37 elisa kit	Neuroscience

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
