

Canine cytokinin MB, CKMB ELISA Kit | CKMB elisa kit

Canine cytokinin MB, CKMB ELISA Kit

CATALOG #
AAA246199

REACTIVITY
Canine

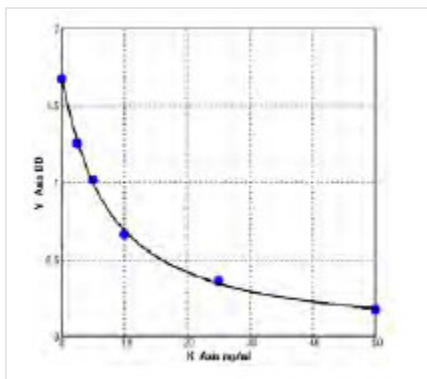

PRODUCT SYNONYMS

cytokinin MB; CKMB; Canine cytokinin MB; CKMB ELISA Kit; CKMB elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Specificity	This assay has high sensitivity and excellent specificity for detection of CKMB. No significant cross-reactivity or interference between CKMB and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between CKMB and all the analogues, therefore, cross reaction may still exist in some cases.
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for CKMB elisa kit	Intended Uses: This CKMB ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Canine CKMB. This ELISA kit for research use only, not for therapeutic or test applications! Principle of the Assay: CKMB ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-CKMB antibody and an CKMB-HRP conjugate. The assay sample and buffer are incubated together with CKMB-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CKMB concentration since CKMB from samples and CKMB-HRP conjugate compete for the anti-CKMB antibody binding site. Since the number of sites is limited, as more sites are occupied by CKMB from the sample, fewer sites are left to bind CKMB-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CKMB concentration in each sample is interpolated from this standard curve.
Product Categories/Family for CKMB elisa kit	Immunology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
