

Porcine Filaggrin ELISA Kit | Filaggrin elisa kit

Porcine Filaggrin ELISA Kit

CATALOG #
AAA246262

REACTIVITY
Porcine

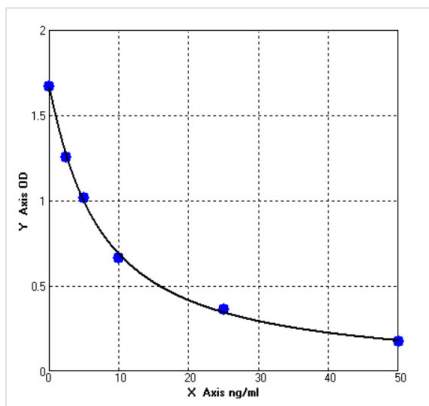

PRODUCT SYNONYMS

Filaggrin; Porcine Filaggrin ELISA Kit; Filaggrin elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Porcine
Specificity	This assay has high sensitivity and excellent specificity for detection of ICAM 1. No significant cross-reactivity or interference between FLGand analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between FLGand all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Filaggrin elisa kit	Principle of the Assay: FLGELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-FLG antibody and an FLG-HRP conjugate. The assay sample and buffer are incubated together with FLG-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the FLG concentration since FLG from samples and FLG-HRP conjugate compete for the anti-FLG antibody binding site. Since the number of sites is limited, as more sites are occupied by FLG from the sample, fewer sites are left to bind FLG-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The FLG concentration in each sample is interpolated from this standard curve. Intended Uses: This FLGELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Porcine FLG. This ELISA kit for research use only, not for therapeutic or test applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	60097902
NCBI GeneID	2312
NCBI Accession #	NP_002007.1
NCBI GenBank Nucleotide #	NM_002016.1
Molecular Weight	435,170 Da
NCBI Official Full Name	filaggrin
NCBI Official Synonym Full Names	filaggrin
NCBI Official Symbol	FLG
NCBI Official Synonym Symbols	ATOD2
NCBI Protein Information	filaggrin; epidermal filaggrin
UniProt Protein Name	Filaggrin
UniProt Gene Name	FLG
UniProt Entry Name	FILA_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
