

Mouse Collagen alpha-3 (IV) chain (COL4A3) ELISA Kit | COL4A3 elisa kit

Mouse Collagen alpha-3 (IV) chain (COL4A3) ELISA Kit

CATALOG #
AAA246438

REACTIVITY
Mouse

PRODUCT SYNONYMS

Collagen alpha-3 (IV) chain (COL4A3); Mouse Collagen alpha-3 (IV) chain (COL4A3) ELISA Kit; COL4A3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of COL4A3. No significant cross-reactivity or interference between COL4A3 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between COL4A3 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for COL4A3 elisa kit	Principle of the Assay: COL4A3 ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-COL4A3 antibody and an COL4A3-HRP conjugate. The assay sample and buffer are incubated together with COL4A3-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the COL4A3 concentration since COL4A3 from samples and COL4A3-HRP conjugate compete for the anti-COL4A3 antibody binding site. Since the number of sites is limited, as more sites are occupied by COL4A3 from the sample, fewer sites are left to bind COL4A3-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The COL4A3 concentration in each sample is interpolated from this standard curve. Intended Uses: This COL4A3 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse COL4A3. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for COL4A3 elisa kit	Signal Transduction

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
