

Mouse 12-Hydroxyeicosatetraenoic acid ELISA Kit | 12-HETE elisa kit

Mouse 12-Hydroxyeicosatetraenoic acid ELISA Kit

CATALOG #
AAA246511

REACTIVITY
Mouse

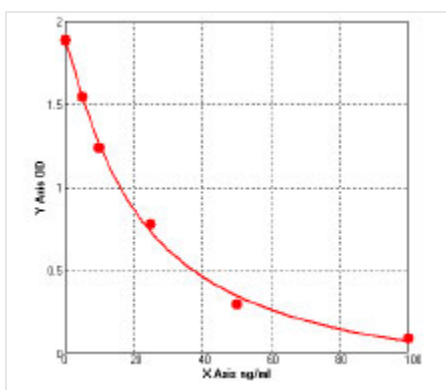

PRODUCT SYNONYMS

12-Hydroxyeicosatetraenoic acid; Mouse 12-Hydroxyeicosatetraenoic acid ELISA Kit; 12-HETE elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, Plasma, Cell Culture Supernatants, Body Fluid And Tissue Homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 pg/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

Intended Uses: This 11KTESTO ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Fish 11KTESTO. This ELISA kit for research use only!

Principle of the Assay: 11KTESTO ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-11KTESTO antibody and an 11KTESTO-HRP conjugate. The assay sample and buffer are incubated together with 11KTESTO-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the 11KTESTO concentration since 11KTESTO from samples and 11KTESTO-HRP conjugate compete for the anti-11KTESTO antibody binding site. Since the number of sites is limited, as more sites are occupied by 11KTESTO from the sample, fewer sites are left to bind 11KTESTO-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The 11KTESTO concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
