

Mouse anti-Mi2-antibody ELISA Kit

Mouse anti-Mi2-antibody ELISA Kit

CATALOG #
AAA246530

REACTIVITY
Mouse

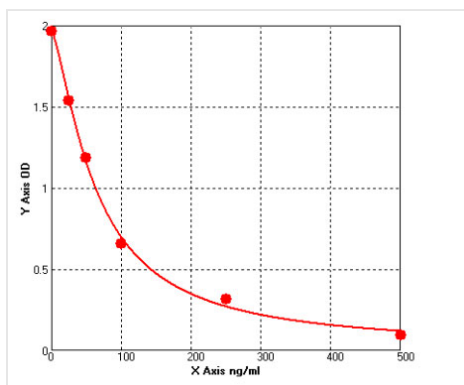

PRODUCT SYNONYMS

anti-Mi2-antibody; Mouse anti-Mi2-antibody ELISA Kit; anti-Mi2-antibody elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Mi2Ab. No significant cross-reactivity or interference between Mi2Ab and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between Mi2Ab and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for anti-Mi2-antibody elisa kit	Principle of the Assay: Mi2Ab ELISA kit applies the competitive enzyme immunoassay technique utilizing Mi2 antigen and an Mi2Ab-HRP conjugate. The assay sample and buffer are incubated together with Mi2Ab-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the Mi2Ab concentration since Mi2Ab from samples and Mi2Ab-HRP conjugate compete for the Mi2 antigen binding site. Since the number of sites is limited, as more sites are occupied by Mi2Ab from the sample, fewer sites are left to bind Mi2Ab-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Mi2Ab concentration in each sample is interpolated from this standard curve. Intended Uses: This Mi2Ab ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse Mi2Ab. This ELISA kit for research use only, not for therapeutic or test applications!
--	--

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
