

Mouse Arginase 2 (ARG2) ELISA Kit | ARG2 elisa kit

Mouse Arginase 2 (ARG2) ELISA Kit

CATALOG #
AAA247056

REACTIVITY
Mouse

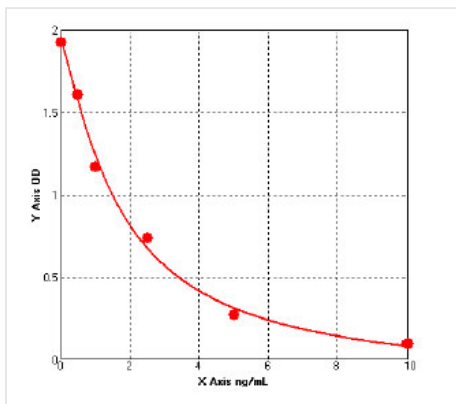

PRODUCT SYNONYMS

Arginase 2 (ARG2); Mouse Arginase 2 (ARG2) ELISA Kit; ARG2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of ARG2. No significant cross-reactivity or interference between ARG2 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between ARG2 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/ml
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for ARG2 elisa kit	Principle of the Assay: ARG2 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-ARG2 antibody and an ARG2-HRP conjugate. The assay sample and buffer are incubated together with ARG2-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ARG2 concentration since ARG2 from samples and ARG2-HRP conjugate compete for the anti-ARG2 antibody binding site. Since the number of sites is limited, as more sites are occupied by ARG2 from the sample, fewer sites are left to bind ARG2-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ARG2 concentration in each sample is interpolated from this standard curve. Intended Uses: This ARG2 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse ARG2. This ELISA kit for research use only, not for therapeutic or test applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	638263160
NCBI GeneID	103175210
NCBI Accession #	NP_001279186.1
NCBI GenBank Nucleotide #	NM_001292257.1
NCBI Official Full Name	arginase 2
NCBI Official Symbol	arg2
NCBI Protein Information	arginase 2; arginase type 2

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
