

Mouse Collagen alpha-1 (XVII) chain (COL17A1) ELISA Kit | COL17A1 elisa kit

Mouse Collagen alpha-1 (XVII) chain (COL17A1) ELISA Kit

CATALOG #
AAA247096

REACTIVITY
Mouse

PRODUCT SYNONYMS

Collagen alpha-1 (XVII) chain (COL17A1); Mouse Collagen alpha-1 (XVII) chain (COL17A1) ELISA Kit; COL17A1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	2.5-50ng/mL
Sensitivity	0.1ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

Intended Uses||This ACTN4ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse COL17A1. This ELISA kit for research use only!

Principle of the Assay: ACTN4 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-ACTN4 antibody and an ACTN4-HRP conjugate. The assay sample and buffer are incubated together with ACTN4-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ACTN4 concentration since ACTN4 from samples and ACTN4-HRP conjugate compete for the anti-ACTN4 antibody binding site. Since the number of sites is limited, as more sites are occupied by ACTN4 from the sample, fewer sites are left to bind ACTN4-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ACTN4 concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
