

Human Cardiac myosin-light chains 1,CMLC-1 ELISA Kit | CMLC-1 elisa kit

Human Cardiac myosin-light chains 1, CMLC-1 ELISA Kit

CATALOG #
AAA247152

REACTIVITY
Human

PRODUCT SYNONYMS

Cardiac myosin-light chains 1; CMLC-1; Human Cardiac myosin-light chains 1; CMLC-1 ELISA Kit; CMLC-1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of CMLC1. No significant cross-reactivity or interference between CMLC1 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between CMLC1 and all the analogues, therefore, cross reaction may still exist in some cases.
Sequence Length	195
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL

ADDITIONAL INFORMATION

Related Product Information for CMLC-1 elisa kit	Principle of the Assay: CMLC1 ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-CMLC1 antibody and an CMLC1-HRP conjugate. The assay sample and buffer are incubated together with CMLC1-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CMLC1 concentration since CMLC1 from samples and CMLC1-HRP conjugate compete for the anti-CMLC1 antibody binding site. Since the number of sites is limited, as more sites are occupied by CMLC1 from the sample, fewer sites are left to bind CMLC1-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CMLC1 concentration in each sample is interpolated from this standard curve. Intended Uses: This CMLC1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human CMLC1. This ELISA kit for research use only, not for therapeutic or test applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	9651188
NCBI GeneID	4634
Molecular Weight	21,932 Da
NCBI Official Full Name	cardiac myosin light chain-1
NCBI Official Synonym Full Names	myosin light chain 3
NCBI Official Symbol	MYL3
NCBI Official Synonym Symbols	CMH8; VLC1; VLCI; MLC1V; MLC1SB; MLC-IV/sb
NCBI Protein Information	myosin light chain 3
UniProt Protein Name	Myosin light chain 3
UniProt Gene Name	MYL3
UniProt Synonym Gene Names	MLC-IV/sb

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
