

Human mitochondrial respiratory chain complex I ELISA Kit | mrccl elisa kit

Human mitochondrial respiratory chain complex I ELISA Kit

CATALOG #
AAA247190

REACTIVITY
Human

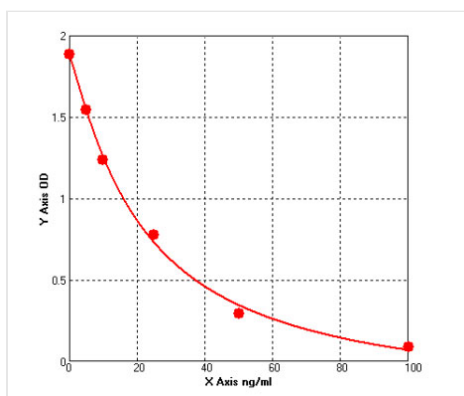

PRODUCT SYNONYMS

mitochondrial respiratory chain complex I; Human mitochondrial respiratory chain complex I ELISA Kit; mrccl elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of MRCC1. No significant cross-reactivity or interference between MRCC1 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between MRCC1 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL

ADDITIONAL INFORMATION

Related Product Information for mrcc1 elisa kit	Principle of the Assay: MRCC1 ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-MRCC1 antibody and an MRCC1-HRP conjugate. The assay sample and buffer are incubated together with MRCC1-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the MRCC1 concentration since MRCC1 from samples and MRCC1-HRP conjugate compete for the anti-MRCC1 antibody binding site. Since the number of sites is limited, as more sites are occupied by MRCC1 from the sample, fewer sites are left to bind MRCC1-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The MRCC1 concentration in each sample is interpolated from this standard curve. Intended Uses: This MRCC1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human MRCC1. This ELISA kit for research use only, not for therapeutic or test applications!
---	---

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
