

Human Vitamin H ELISA Kit | VH elisa kit

Human Vitamin H ELISA Kit

CATALOG #
AAA247237

REACTIVITY
Human

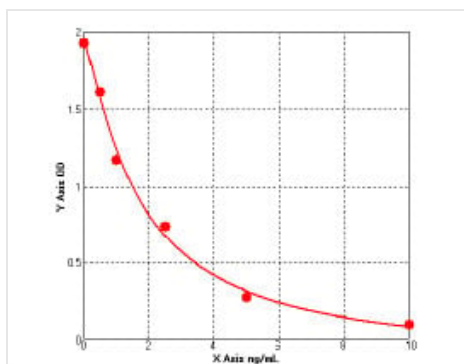

PRODUCT SYNONYMS

Vitamin H; Human Vitamin H ELISA Kit; VH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of VH. No significant cross-reactivity or interference between VH and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between VH and all the analogues, therefore, cross reaction may still exist in some cases.
Sequence Length	469
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	0.1 ng/mL

ADDITIONAL INFORMATION

Related Product Information for VH elisa kit	Intended Uses: This VH ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human VH. This ELISA kit for research use only, not for therapeutic or test applications! Principle of the Assay: VH ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-VH antibody and an VH-HRP conjugate. The assay sample and buffer are incubated together with VH-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the VH concentration since VH from samples and VH-HRP conjugate compete for the anti-VH antibody binding site. Since the number of sites is limited, as more sites are occupied by VH from the sample, fewer sites are left to bind VH-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The VH concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	1283015597
NCBI Official Full Name	vitamin H

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
