

Monkey C-X-C Motif Chemokine 11 ELISA Kit | CXCL11 elisa kit

Monkey C-X-C Motif Chemokine 11 ELISA Kit

CATALOG #
AAA247480

REACTIVITY
Monkey

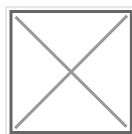

PRODUCT SYNONYMS

C-X-C Motif Chemokine 11; Monkey C-X-C Motif Chemokine 11 ELISA Kit; CXCL11 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Specificity	This assay has high sensitivity and excellent specificity for detection of CXCL-11. No significant cross-reactivity or interference between CXCL-11 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between CXCL-11 and all the analogues, therefore, cross reaction may still exist in some cases.
Sequence Length	106
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/ml
Reactivity Note	No significant cross-reactivity or interference between this antigen and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection, therefore, cross reaction may still exist in some cases.
Preparation and Storage	Store at 2-8 degree C. The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.

ADDITIONAL INFORMATION

Related Product Information for CXCL11 elisa kit	Principle of the Assay: CXCL-11 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-CXCL-11 antibody and an CXCL-11-HRP conjugate. The assay sample and buffer are incubated together with CXCL-11-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CXCL-11 concentration since CXCL-11 from samples and CXCL-11-HRP conjugate compete for the anti-CXCL-11 antibody binding site. Since the number of sites is limited, as more sites are occupied by CXCL-11 from the sample, fewer sites are left to bind CXCL-11-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CXCL-11 concentration in each sample is interpolated from this standard curve. Intended Uses: This CXCL-11 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey CXCL-11. This ELISA kit for research use only, not for therapeutic or test applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	693074655
NCBI GeneID	6373
NCBI Accession #	NP_001289052.1
NCBI GenBank Nucleotide #	NM_001302123.1
UniProt Accession #	O14625; Q53YA3; Q92840
Molecular Weight	10,365 Da
NCBI Official Full Name	C-X-C motif chemokine 11 isoform 2
NCBI Official Synonym Full Names	C-X-C motif chemokine ligand 11
NCBI Official Symbol	CXCL11
NCBI Official Synonym Symbols	IP9; H174; IP-9; b-R1; I-TAC; SCYB11; SCYB9B
NCBI Protein Information	C-X-C motif chemokine 11
UniProt Protein Name	C-X-C motif chemokine 11
UniProt Gene Name	CXCL11
UniProt Synonym Gene Names	ITAC; SCYB11; SCYB9B; IP-9; I-TAC

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
