

Mouse Keratin 14 ELISA Kit | KRT14 elisa kit

Mouse Keratin 14 ELISA Kit

CATALOG #
AAA247684

REACTIVITY
Mouse

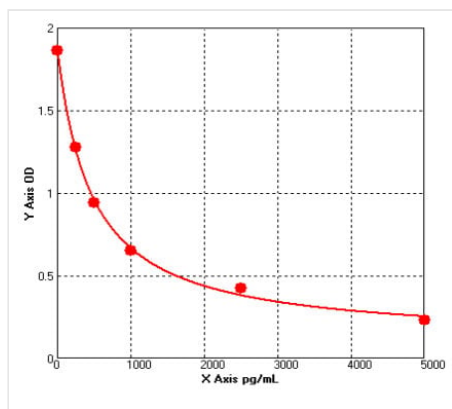

PRODUCT SYNONYMS

Keratin 14; Mouse Keratin 14 ELISA Kit; KRT14 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of KRT14. No significant cross-reactivity or interference between KRT14 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between KRT14 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Intra-Assay	CV<10%
Inter-Assay	CV<15%
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for KRT14 elisa kit	Principle of the Assay: KRT14 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-KRT14 antibody and an KRT14-HRP conjugate. The assay sample and buffer are incubated together with KRT14-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the KRT14 concentration since KRT14 from samples and KRT14-HRP conjugate compete for the anti-KRT14 antibody binding site. Since the number of sites is limited, as more sites are occupied by KRT14 from the sample, fewer sites are left to bind KRT14-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The KRT14 concentration in each sample is interpolated from this standard curve. Intended Uses: This KRT14 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse KRT14. This ELISA kit for research use only, not for therapeutic or test applications!
---	---

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
