

Mouse Phospho Tau(s396) ELISA Kit

Mouse Phospho Tau(s396) ELISA Kit

CATALOG #
AAA247696

REACTIVITY
Mouse

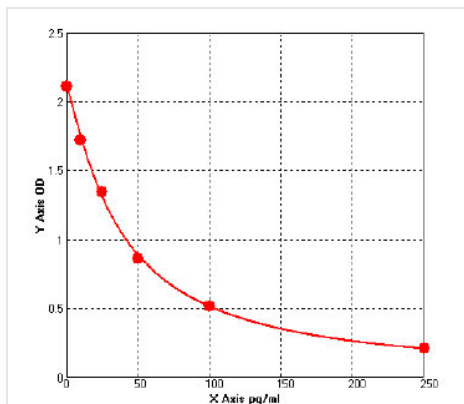

PRODUCT SYNONYMS

Phospho Tau(s396); Mouse Phospho Tau(s396) ELISA Kit; Phospho Tau(s396) elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of S396. No significant cross-reactivity or interference between S396 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between S396 and all the analogues, therefore, cross reaction may still exist in some cases.
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Phospho Tau(s396) elisa kit	Intended Uses: This S396 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse S396. This ELISA kit for research use only, not for therapeutic or test applications! Principle of the Assay: S396 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-S396 antibody and an S396-HRP conjugate. The assay sample and buffer are incubated together with S396-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the S396 concentration since S396 from samples and S396-HRP conjugate compete for the anti-S396 antibody binding site. Since the number of sites is limited, as more sites are occupied by S396 from the sample, fewer sites are left to bind S396-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The S396 concentration in each sample is interpolated from this standard curve.
