

Human Circulating histone 3 ELISA Kit

Human Anti-Circulating histone 3 ELISA Kit

CATALOG # AAA247780	REACTIVITY Human	APPLICATIONS ELISA
-------------------------------	----------------------------	------------------------------

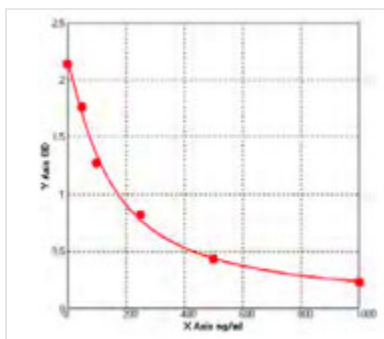

PRODUCT SYNONYMS

Circulating histone 3; Human Anti-Circulating histone 3 ELISA Kit; anti-CirH3; Circulating histone 3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Anti-CirH3. No significant cross-reactivity or interference between Anti-CirH3 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between Anti-CirH3 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Applicable Applications for Circulating histone 3 elisa kit	ELISA
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Circulating histone 3 elisa kit	Principle of the Assay: Anti-CirH3 ELISA kit applies the competitive enzyme immunoassay technique utilizing Circulating Histone 3 antigen and an Anti-CirH3-HRP conjugate. The assay sample and buffer are incubated together with Anti-CirH3-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the Anti-CirH3 concentration since Anti-CirH3 from samples and Anti-CirH3-HRP conjugate compete for the Circulating Histone 3 antigen binding site. Since the number of sites is limited, as more sites are occupied by Anti-CirH3 from the sample, fewer sites are left to bind Anti-CirH3-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Anti-CirH3 concentration in each sample is interpolated from this standard curve. Intended Uses: This Anti-CirH3 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human Anti-CirH3. This ELISA kit for research use only, not for therapeutic or test applications!
--	---

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
