

## Human SI (Sucrase-isomaltase, intestinal) ELISA Kit | SI elisa kit

Human SI (Sucrase-isomaltase, intestinal) ELISA Kit

CATALOG #  
**AAA249648**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

SI (Sucrase-isomaltase; intestinal); Human SI (Sucrase-isomaltase; intestinal) ELISA Kit; Sucrase-isomaltase; intestinal; Sucrase; Isomaltase; SI; SI elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                       |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                 |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of SI. No significant cross-reactivity or interference between SI and analogues was observed. |
| Assay Type              | Sandwich ELISA, Double Antibody                                                                                                                                       |
| Samples                 | Serum, Plasma, Cell Culture Supernatant, cell or tissue lysate, Other liquid samples                                                                                  |
| Detection Range         | 0.313-20ng/ml                                                                                                                                                         |
| Sensitivity             | 0.188ng/ml                                                                                                                                                            |
| Intra-assay Precision   | CV<8%                                                                                                                                                                 |
| Inter-assay Precision   | CV<10%                                                                                                                                                                |
| Preparation and Storage | Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C          |

### ADDITIONAL INFORMATION

#### Related Product Information for SI elisa kit

**Principle of the Assay:** This kit was based on sandwich enzyme-linked immune-sorbent assay technology. Capture antibody was pre-coated onto 96-well plates. And the biotin conjugated antibody was used as detection antibodies. The standards, test samples and biotin conjugated detection antibody were added to the wells subsequently, and washed with wash buffer. HRP-Streptavidin was added and unbound conjugates were washed away with wash buffer. TMB substrates were used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the target amount of sample captured in plate. Read the O.D. absorbance at 450nm in a microplate reader, and then the concentration of target can be calculated.
