

Rat RF-IgM (Rheumatoid Factor IgM) ELISA Kit | RF-IgM elisa kit

Rat RF-IgM (Rheumatoid Factor IgM) ELISA Kit

CATALOG #
AAA249833

REACTIVITY
Rat

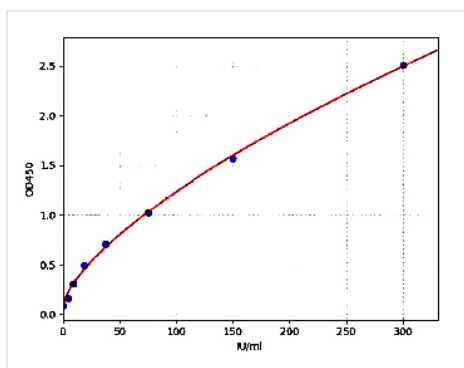

PRODUCT SYNONYMS

RF-IgM (Rheumatoid Factor IgM); Rat RF-IgM (Rheumatoid Factor IgM) ELISA Kit; RF-IgM; Rheumatoid Factor IgM; RF-IgM elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of RF-IgM. No significant cross-reactivity or interference between RF-IgM and analogues was observed.
Assay Type	Indirect ELISA Sandwich
Samples	Serum, Plasma, Cell Culture Supernatant, cell or tissue lysate, Other liquid samples
Detection Range	4.688-300IU/ml
Sensitivity	2.813IU/ml
Intra-assay Precision	CV<8%
Inter-assay Precision	CV<10%
Preparation and Storage	Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C

ADDITIONAL INFORMATION

Related Product Information for RF-IgM elisa kit	Principle of the Assay: This kit was based on indirect enzyme-linked immune-sorbent assay technology. Antigen was pre-coated onto 96-well plates. And the biotin conjugated antibody was used as detection antibodies. The standards, test samples and biotin conjugated detection antibody were added to the wells subsequently, and washed with wash buffer. HRP-Streptavidin was added and unbound conjugates were washed away with wash buffer. TMB substrates were used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the target amount of sample captured in plate. Read the O.D. absorbance at 450nm in a microplate reader, and then the concentration of target can be calculated.
