

Rabbit ST/5-HT (5-hydroxytryptamine) ELISA Kit | 5-HT elisa kit

Rabbit ST/5-HT (5-hydroxytryptamine) ELISA Kit

CATALOG #
AAA250964

REACTIVITY
Rabbit

PRODUCT SYNONYMS

ST/5-HT (5-hydroxytryptamine); Rabbit ST/5-HT (5-hydroxytryptamine) ELISA Kit; 5-HT; ST/5-HT; 5-hydroxytryptamine; 5-HT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Specificity	Specifically recognize 5-HT, no obvious cross reaction with other analogues
Assay Type	Competitive
Samples	Serum, plasma, cell culture supernatant and other biological samples
Detection Range	1.563-100ng/ml
Sensitivity	0.938ng/ml
Intra-assay Precision	Intra-assay Precision: samples with low, medium and high concentration are tested 20 times on same plate.
Inter-assay Precision	Inter-assay Precision: samples with low, medium and high concentration are tested 20 times on three different plates.
Preparation and Storage	Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C

ADDITIONAL INFORMATION

Related Product Information for 5-HT elisa kit	Principle of the Assay: This kit was based on Competitive-ELISA detection method. The microtiter plate provided in this kit has been pre-coated with 5-HT. During the reaction, 5-HT in the sample or standard competes with a fixed amount of 5-HT on the solid phase supporter for sites on the Biotinylated Detection Antibody specific to 5-HT. Excess conjugate and unbound sample or standard are washed from the plate, and HRP-Streptavidin (SABC) is added to each microplate well and incubated. Then TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of a acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm. The concentration of 5-HT in the samples is then determined by comparing the OD of the samples to the standard curve. The concentration of the target substance was inversely proportional to the OD450 value.
--	---

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
