

Mouse AP36 (Apelin 36) ELISA Kit | AP36 elisa kit

Mouse AP36 (Apelin 36) ELISA Kit

CATALOG #
AAA251058

REACTIVITY
Mouse

PRODUCT SYNONYMS

AP36 (Apelin 36); Mouse AP36 (Apelin 36) ELISA Kit; AP36; APJ endogenous ligand; Apelin 36; AP36 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	Specifically recognize AP36, no obvious cross reaction with other analogues
Assay Type	Competitive
Samples	Serum, plasma, cell culture supernatant and other biological samples
Detection Range	31.2-2000pg/ml
Sensitivity	18.75pg/ml
Intra-assay Precision	Intra-assay Precision: samples with low, medium and high concentration are tested 20 times on same plate.
Inter-assay Precision	Inter-assay Precision: samples with low, medium and high concentration are tested 20 times on three different plates.
Preparation and Storage	Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C

ADDITIONAL INFORMATION

Related Product Information for AP36 elisa kit	Principle of the Assay: This kit was based on Competitive-ELISA detection method. The microtiter plate provided in this kit has been pre-coated with AP36. During the reaction, AP36 in the sample or standard competes with a fixed amount of AP36 on the solid phase supporter for sites on the Biotinylated Detection Antibody specific to AP36. Excess conjugate and unbound sample or standard are washed from the plate, and HRP-Streptavidin (SABC) is added to each microplate well and incubated. Then TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of a acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm. The concentration of AP36 in the samples is then determined by comparing the OD of the samples to the standard curve. The concentration of the target substance was inversely proportional to the OD450 value.
