

General Ceramide (Ceramide) ELISA Kit

Universal Ceramide (Ceramide) ELISA Kit

CATALOG #
AAA251139

REACTIVITY
General

PRODUCT SYNONYMS

Ceramide (Ceramide); Universal Ceramide (Ceramide) ELISA Kit; Ceramide; Ceramide (Ceramide) elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	Specifically recognize Ceramide, no obvious cross reaction with other analogues
Assay Type	Competitive
Samples	Serum, plasma, cell culture supernatant and other biological samples
Detection Range	31.2-2000pg/ml
Sensitivity	18.75pg/ml
Intra-assay Precision	Intra-assay Precision: samples with low, medium and high concentration are tested 20 times on same plate.
Inter-assay Precision	Inter-assay Precision: samples with low, medium and high concentration are tested 20 times on three different plates.
Preparation and Storage	Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C

ADDITIONAL INFORMATION

Related Product Information for Ceramide (Ceramide) elisa kit

Principle of the Assay: This kit was based on Competitive-ELISA detection method. The microtiter plate provided in this kit has been pre-coated with Ceramide. During the reaction, Ceramide in the sample or standard competes with a fixed amount of Ceramide on the solid phase supporter for sites on the Biotinylated Detection Antibody specific to Ceramide. Excess conjugate and unbound sample or standard are washed from the plate, and HRPStreptavidin (SABC) is added to each microplate well and incubated. Then TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of an acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm. The concentration of Ceramide in the samples is then determined by comparing the OD of the samples to the standard curve. The concentration of the target substance was inversely proportional to the OD450 value.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
