

## Human PMEPA1 (Protein TMEPAI) ELISA Kit | PMEPA1 elisa kit

Human PMEPA1 (Protein TMEPAI) ELISA Kit

CATALOG #  
**AAA251409**

REACTIVITY  
**Human**

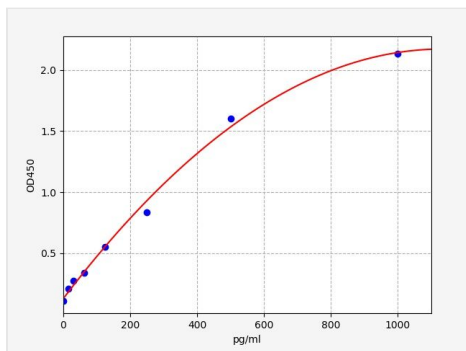

### PRODUCT SYNONYMS

PMEPA1 (Protein TMEPAI); Human PMEPA1 (Protein TMEPAI) ELISA Kit; Protein TMEPAI; Prostate transmembrane protein androgen induced 1; Solid tumor-associated 1 protein; Transmembrane prostate androgen-induced protein; PMEPA1; STAG1; TMEPAI; PMEPA1 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                      |
|-------------------------|--------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                |
| Assay Type              | Sandwich ELISA, Double Antibody                                                      |
| Samples                 | Serum, Plasma, Cell Culture Supernatant, cell or tissue lysate, Other liquid samples |
| Detection Range         | 15.625-1000pg/ml                                                                     |
| Sensitivity             | 9.375pg/ml                                                                           |
| Time                    | 4 hours                                                                              |
| Preparation and Storage | Store at 2-8 degree C for 12 months                                                  |

### NCBI AND UNIPROT INFORMATION

|                           |                                                           |
|---------------------------|-----------------------------------------------------------|
| NCBI GI #                 | 364023812                                                 |
| NCBI GeneID               | 56937                                                     |
| NCBI Accession #          | NP_001242905.1                                            |
| NCBI GenBank Nucleotide # | NM_001255976.1                                            |
| UniProt Accession #       | Q969W9; Q5TDR6; Q8NER4; Q96B72; Q9UJD3                    |
| Molecular Weight          | 31,609 Da                                                 |
| NCBI Official Full Name   | transmembrane prostate androgen-induced protein isoform d |

|                                  |                                                                                                                                 |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| NCBI Official Synonym Full Names | prostate transmembrane protein, androgen induced 1                                                                              |
| NCBI Official Symbol             | PMEPA1                                                                                                                          |
| NCBI Official Synonym Symbols    | STAG1; TMEPAI                                                                                                                   |
| NCBI Protein Information         | transmembrane prostate androgen-induced protein; solid tumor-associated 1 protein; transmembrane, prostate androgen induced RNA |
| UniProt Protein Name             | Transmembrane prostate androgen-induced protein                                                                                 |
| UniProt Gene Name                | <b>PMEPA1</b>                                                                                                                   |
| UniProt Synonym Gene Names       | STAG1; TMEPAI                                                                                                                   |
| UniProt Entry Name               | PMEPA_HUMAN                                                                                                                     |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
