Clonality	Monoclonal
Isotype	Mouse IgG2b
Clone Number	03
Specificity	Human NRG1-beta 1. No cross-reactivity in WB with Human NRG1-alpha
Purity/Purification	Protein A
Form/Format	0.2um filtered solution in PBS
Applicable Applications for anti-NRG1 antibody	WB (Western Blot)
Immunogen	A synthetic peptide corresponding to the center region of the human NRG1 isoform beta 1
Preparation	This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, a synthetic peptide corresponding to the center region of the human NRG1 isoform beta 1. The IgG fraction of the cell culture supernatant was purified by Protein A affinity chromatography.
Preparation and Storage	This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Sodium azide is recommended to avoid contamination (final concentration 0.05%-0.1%). It is toxic to cells and should be disposed of properly. Avoid repeated freeze-thaw cycles.
