

Mouse CD36 Monoclonal Antibody | anti-CD36 antibody

Anti-CD36 Antibody, Mouse Monoclonal

CATALOG # AAA255139	HOST Mouse	APPLICATIONS ELISA
-------------------------------	----------------------	------------------------------

PRODUCT SYNONYMS

CD36; Monoclonal Antibody; Anti-CD36 Antibody; Mouse Monoclonal; CD36/SCARB3 Antibody; Mouse MAb; CD36 molecule (thrombospondin receptor); Anti-BDPLT10 Antibody; Anti-CHDS7 Antibody; Anti-FAT Antibody; Anti-GP3B Antibody; Anti-GP4 Antibody; Anti-GPIV Antibody; Anti-PASIV Antibody; Anti-SCARB3 Antibody; anti-CD36 antibody

PRODUCT SPECIFICATIONS

Host	Mouse
Clonality	Monoclonal
Isotype	IgG1
Clone Number	04
Specificity	Human CD36 / SCARB3
Form/Format	Liquid; 0.2um filtered solution in PBS
Applicable Applications for anti-CD36 antibody	ELISA
Immunogen	Recombinant Human CD36/SCARB3 Protein ()
Preparation	This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, recombinant Human CD36/SCARB3 (rh CD36/SCARB3). The IgG fraction of the cell culture supernatant was purified by Protein A affinity chromatography.
Preparation and Storage	This antibody can be stored at 2-8 degree C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20 degree C to -80 degree C. Preservative-Free. Avoid repeated freeze-thaw cycles.

ADDITIONAL INFORMATION

Related Product Information for anti-CD36 antibody	The cluster of differentiation (CD) system is commonly used as cell markers in Immunophenotyping. Different kinds of cells in the immune system can be identified through the surface CD molecules associating with the immune function of the cell. There are more than 320 CD unique clusters and subclusters have been identified. Some of the CD molecules serve as receptors or ligands important to the cell through initiating a signal cascade which then alter the behavior of the cell. Some CD proteins do not take part in cell signal process but have other functions such as cell adhesion. Cluster of differentiation 36 (CD36), also known as FAT, SCARB3, GP88, glycoprotein IV (gpIV) and glycoprotein IIb (gpIIb), is a member of the CD system as well as the class B scavenger receptor family of cell surface proteins. CD36 can be found on the surface of many cell types in vertebrate animals and it consists of 472 amino acids and is extensively glycosylated. It is an integral membrane protein primarily serving as receptors for thrombospondin and collagen and by the erythrocytes infected with the human malaria parasite. The role of CD36 as a cell surface receptor has been extended to that of a signal transduction molecule.
