

Rabbit anti-Human BTD Polyclonal Antibody | anti-BTD antibody

Anti-BTD Antibody, Rabbit Polyclonal

CATALOG # AAA255835	HOST Rabbit	REACTIVITY Human	APPLICATIONS Immunohistochemistry, ELISA, Western Blot
-------------------------------	-----------------------	----------------------------	--

PRODUCT SYNONYMS

BTB; Polyclonal Antibody; Anti-BTD Antibody; Rabbit Polyclonal; Biotinidase/biotinase/BTD Antibody; Rabbit PAb; Antigen Affinity Purified; biotinidase; anti-BTD antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Human
Clonality	Polyclonal
Isotype	Rabbit IgG
Specificity	Human Biotinidase/biotinase/BTD
Purity/Purification	Protein A & Antigen Affinity
Form/Format	Liquid; 0.2um filtered solution in PBS
Applicable Applications for anti-BTD antibody	IHC (Immunohistochemistry), ELISA, WB (Western Blot)
Immunogen	Recombinant Human Biotinidase/biotinase/BTD protein
Conjugation	Unconjugated
Preparation	Produced in rabbits immunized with purified, recombinant Human Biotinidase/biotinase/BTD (rh Biotinidase/biotinase/BTD). Biotinidase/biotinase/BTD specific IgG was purified by Human Biotinidase/biotinase/BTD affinity chromatography.
Preparation and Storage	This antibody can be stored at 2-8 degree C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20 degree C to -80 degree C. Preservative-Free. Avoid repeated freeze-thaw cycles.

IMAGES

WB (Western Blot)

Anti-BTD rabbit polyclonal antibody at 1:500 dilutionLane A: Jurkat Whole Cell LysateLysates/proteins at 30 ug per lane.SecondaryGoat Anti-Rabbit IgG H&L (Dylight800) at 1/10000 dilution.Developed using the Odyssey technique.Performed under reducing conditions.Predicted band size:61 kDaObserved band size:48 kDa

IHC (Immunohistochemistry)

Immunochemical staining of human BTD in human liver with rabbit polyclonal antibody (1:5000, formalin-fixed paraffin embedded sections).

IHC (Immunohistochemistry)

Immunochemical staining of human BTD in human kidney with rabbit polyclonal antibody (1:5000, formalin-fixed paraffin embedded sections).

ADDITIONAL INFORMATION

Related Product Information for anti-BTD antibody	Biotinidase, also known as biotinase and BTD, is a ubiquitous mammalian cell enzyme which expressed at high levels in the liver, serum, and kidney. Its primary function is to cleave biotin from biocytin, preserving the pool of biotin for use as a cofactor for biotin dependent enzymes, namely the 4 human carboxylases. Biotinidase also recycles biotin from enzymes in the body that use it as a helper component in order to function. These enzymes, known as carboxylases, are important in the processing of fats, carbohydrates, and proteins. Biotin is attached to these carboxylase enzymes through an amino acid (the building material of proteins) called lysine, forming a complex called biocytin.

NCBI AND UNIPROT INFORMATION

NCBI GI #	4557373
NCBI GeneID	686
NCBI Accession #	NP_000051.1
NCBI GenBank Nucleotide #	NM_000060.4
UniProt Accession #	P43251; Q96EM9; A6NHF2; B2R865; B4DFX1; B4DLJ9; B7Z7C9; F8W1Q3

Molecular Weight	58,913 Da
NCBI Official Full Name	biotinidase isoform 3
NCBI Official Synonym Full Names	biotinidase
NCBI Official Symbol	BTD
NCBI Protein Information	biotinidase
UniProt Protein Name	Biotinidase
UniProt Gene Name	BTD
UniProt Synonym Gene Names	Biotinase

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
