ADDITIONAL INFORMATION

Related Product Information for anti-VPS26A antibody	Mammals have two paralogues of the vacuolar protein sorting 26 (VPS26) subunit that share 70% amino acid identity; VPS26A and VPS26B. As a retromer subunit, VPS26A can bind to the PDZ domain of SNX27. The regulation of the VPS26A-SNX27 interaction that modifies mGluR5 trafficking and expression in the dorsal horn provides a novel therapeutic strategy for pain relief.
