Rabbit anti-Human ZNF879 Polyclonal Antibody | anti-ZNF879 antibody

Anti-ZNF879 Antibody, Rabbit Polyclonal

CATALOG #	HOST	REACTIVITY	APPLICATIONS
AAA256715	**Rabbit**	**Human**	**Immunohistochemistry**

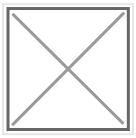

PRODUCT SYNONYMS

ZNF879; Polyclonal Antibody; Anti-ZNF879 Antibody; Rabbit Polyclonal; ZNF879 Antibody; Rabbit PAb; Antigen Affinity Purified; Anti-DKFZp686E2433 Antibody; anti-ZNF879 antibody

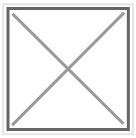

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Human
Clonality	Polyclonal
Isotype	Rabbit IgG
Specificity	Human ZNF879
Purity/Purification	Protein A & Antigen Affinity
Form/Format	Liquid; PBS, pH7.0 with 0.03% Proclin300
Applicable Applications for anti-ZNF879 antibody	IHC (Immunohistochemistry)
Immunogen	E Coli-derived Human ZNF879 fragment
Conjugation	Unconjugated
Preparation	Produced in rabbits immunized with E Coli-derived Human ZNF879 fragment, and purified by antigen affinity chromatography.
Preparation and Storage	This antibody can be stored at 2-8 degree C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20 degree C to -80 degree C. Avoid repeated freeze-thaw cycles.

IMAGES

IHC (Immunohiostchemistry)
Immunochemical staining of human ZNF879 in human breast with rabbit polyclonal antibody at 1:500 dilution, formalin-fixed paraffin embedded sections.

IHC (Immunohistochemistry)
Immunochemical staining of human ZNF879 in human gallbladder with rabbit polyclonal antibody at 1:500 dilution, formalin-fixed paraffin embedded sections.

ADDITIONAL INFORMATION

Related Product Information for anti-ZNF879 antibody	ZNF879 (Zinc Finger Protein 879, also known as DKFZp686E2433) is located on human chromosome 5q35.3. ZNF879 gene encodes a kruppel-associated box-containing zinc finger protein (KRAB-ZFP). The ZNF879 protein is broadly expressed in testis, thyroid and other tissues. The encoded ZNF879 protein contains an N-terminal kruppel-associated box (KRAB) domain and thirteen C-terminal C2H2-type zinc finger domains. The KRAB-ZFPs represent the largest family of mammalian transcriptional repressors, which function through the recruitment of the nuclear co-factor KRAB-Associated Protein 1 (KAP1), to engage histone modifiers and induce heterochromatin formation. ZNF879 may be involved in transcriptional regulation.
