

Rabbit MGA Polyclonal Antibody | anti-MGA antibody

Anti-MGA Antibody, Rabbit Polyclonal

CATALOG # AAA256745	HOST Rabbit	APPLICATIONS Immunofluorescence, Immunocytochemistry
-------------------------------	-----------------------	--

PRODUCT SYNONYMS

MGA; Polyclonal Antibody; Anti-MGA Antibody; Rabbit Polyclonal; MGA Antibody; Rabbit PAb; Antigen Affinity Purified; Anti-MGAM Antibody; Anti-MGAML Antibody; anti-MGA antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Specificity	Human MGA
Purity/Purification	Affinity Purified
Form/Format	Liquid; PBS, pH7.0 with 0.03% Proclin300
Applicable Applications for anti-MGA antibody	IF (Immunofluorescence), ICC (Immunocytochemistry)
Immunogen	E Coli-derived Human MGA fragment
Preparation	Produced in rabbits immunized with E Coli-derived Human MGA fragment, and purified by antigen affinity chromatography.
Preparation and Storage	This antibody can be stored at 2°C to 8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Avoid repeated freeze-thaw cycles.

IMAGES

IF (Immunofluorescence)

Immunofluorescence staining of MGA in HeLa cells. Cells were fixed with 4% PFA, permeabilized with 0.1% Triton X-100 in PBS, blocked with 10% serum, and incubated with rabbit anti-Human MGA polyclonal antibody (dilution ratio 1:200) at 4 degree C overnight. Then cells were stained with the Alexa Fluor488-conjugated Goat Anti-rabbit IgG secondary antibody (green) and counterstained with DAPI (blue). Positive staining was localized to Nucleus and Cytoplasm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
