

Rabbit anti-Human CHML Polyclonal Antibody | anti-CHML antibody

Anti-CHML Antibody, Rabbit Polyclonal

CATALOG # AAA256780	HOST Rabbit	REACTIVITY Human	APPLICATIONS Immunohistochemistry
-------------------------------	-----------------------	----------------------------	---

PRODUCT SYNONYMS

CHML; Polyclonal Antibody; Anti-CHML Antibody; Rabbit Polyclonal; CHML Antibody; Rabbit PAb; Antigen Affinity Purified; Anti-REP2 Antibody; anti-CHML antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Human
Clonality	Polyclonal
Isotype	Rabbit IgG
Specificity	Human CHML
Purity/Purification	Protein A & Antigen Affinity
Form/Format	Liquid; PBS, pH7.0 with 0.03% Proclin300
Applicable Applications for anti-CHML antibody	IHC (Immunohistochemistry)
Immunogen	E Coli-derived Human CHML fragment
Conjugation	Unconjugated
Preparation	Produced in rabbits immunized with E Coli-derived Human CHML fragment, and purified by antigen affinity chromatography.
Preparation and Storage	This antibody can be stored at 2-8 degree C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20 degree C to -80 degree C. Avoid repeated freeze-thaw cycles.

IMAGES

IHC (Immunohistochemistry)

Immunochemical staining of human CHML in human gallbladder with rabbit polyclonal antibody at 1:300 dilution, formalin-fixed paraffin embedded sections.

IHC (Immunohistochemistry)

Immunochemical staining of human CHML in human brain with rabbit polyclonal antibody at 1:300 dilution, formalin-fixed paraffin embedded sections.

ADDITIONAL INFORMATION

Related Product Information for anti-CHML antibody	Choroideremia-like (CHML) protein is essential for the prenylation modification of various Rab proteins and it exerts biological effects on vesicle trafficking and signal transduction. High expression of CHML is associated with poor survival, which is related to cell proliferation and cell division of myeloma cells. CHML as a potential promoter of hepatocellular carcinoma (HCC) metastasis, and the CHML-Rab14 axis may be a promising therapeutic target for HCC.
References	Zhang W, et al. (2019) High expression of chml predicts poor prognosis of multiple myeloma. J Cancer 10 (24): 6048-6056.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
