

Interferon alpha 2/IFNA2 Recombinant Protein | IFNA2 recombinant protein

Interferon alpha 2/IFNA2 Protein, Mouse, Recombinant

CATALOG #
AAA257478

HOST
Yeast

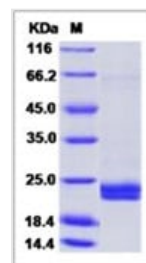

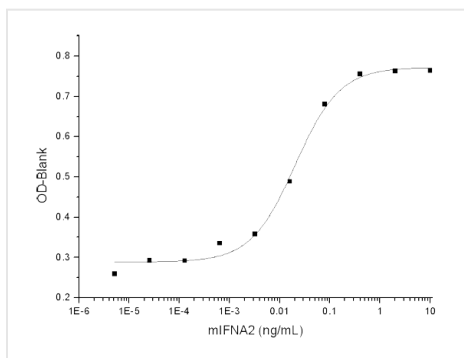

PRODUCT SYNONYMS

Interferon alpha 2/IFNA2; Interferon alpha 2/IFNA2 Protein; Mouse; Recombinant; Mouse IFNA2/Interferon alpha 2 Protein; interferon; alpha 2; Ifa2 Protein; IFNA2 recombinant protein

PRODUCT SPECIFICATIONS

Host	Yeast
Purity/Purification	>95 % as determined by SDS-PAGE.
Form/Format	Lyophilized from sterile PBS, pH7.4. Normally 5%-8% trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization.
Sequence Positions	167aa
Sequence	Cys24-Glu190
Species	Mouse
Predicted N Terminal	Cys24
Protein Construction	IA DNA sequence encoding the mouse Ifna2 (NP_034633.2) (Cys24-Glu190) was expressed
Activity	Measured in antiviral assays using L929 cells infected with vesicular stomatitis virus(VSV). The ED50 for this effect is typically 25-100 pg/mL.
Preparation and Storage	Samples are stable for up to twelve months from date of receipt at -20 degree C to -80 degree C. Store it under sterile conditions at -20 degree C to -80 degree C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles. Shipping: They are shipped out with blue ice pack

Application Data

Measured in antiviral assays using L929 cells infected with vesicular stomatitis virus(VSV).
The ED50 for this effect is typically 25-100 pg/mL.

ADDITIONAL INFORMATION

Related Product Information for IFNA2 recombinant protein	IFNA2 (Interferon Alpha 2) is a Protein Coding gene. This gene is a member of the alpha interferon gene cluster on chromosome 9. The encoded protein is a cytokine produced in response to viral infection. Type I Interferons (IFNs) are well-known cytokines that exert antiviral activity, antitumor activity, and immunomodulatory effects. Interferon tau (IFNT), a type I IFN similar to alpha IFNs (IFNA), is the pregnancy recognition signal produced by the ruminant conceptus. Among the IFN-alpha genes, a total of 28 different sequence variants have been described. The three principal subtypes of IFNalpha-2 are designated alpha-2a, alpha-2b, and alpha-2c. IFNalpha-2b is being the predominant allele while IFNalpha-2a is less predominant and IFNalpha-2c only a minor allelic variant.

NCBI AND UNIPROT INFORMATION

NCBI GI #	126722649
NCBI GeneID	15965
NCBI Accession #	NP_034633.2
NCBI GenBank Nucleotide #	NM_010503.2
UniProt Accession #	P01573; Q61717
Molecular Weight	21,922 Da
NCBI Official Full Name	interferon alpha-2
NCBI Official Synonym Full Names	interferon alpha 2
NCBI Official Symbol	Ifna2
NCBI Official Synonym Symbols	Ifa2
NCBI Protein Information	interferon alpha-2
UniProt Protein Name	Interferon alpha-2
UniProt Gene Name	Ifna2
UniProt Synonym Gene Names	IFN-alpha-2

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
