ADDITIONAL INFORMATION

Related Product Information for CD48/SLAMF2 elisa kit	This CD48 ELISA Kit, Human is an enzyme-linked immunosorbent assay for the quantitative measurement of Human CD48 protein in Serum. It contains recombinant Human CD48, and antibodies raised against the recombinant protein. This ELISA kit is complete and ready-to-use. Background: Cluster of Differentiation 48 (CD48), also known as SLAMF2, BCM-1 and BLAST-1, is a GPI-linked protein belonging to the CD2 subfamily of immunoglobulin superfamily molecules. CD2 and 2B4 (CD244) are known ligands for CD48. CD48 protein is expressed on most lineage-committed hematopoietic cells but not on hematopoietic stem cells or multipotent hematopoietic progenitors. CD48 protein performs biological functions in a variety processes including adhesion, pathogen recognition, cellular activation, and cytokine regulation, and emerges as a critical effector molecule in immune responses.
