

Human CD62L/L-Selectin ELISA Kit | CD62L elisa kit

Human CD62L/L-Selectin ELISA Kit

CATALOG #
AAA258436

REACTIVITY
Human

PRODUCT SYNONYMS

CD62L/L-Selectin; Human CD62L/L-Selectin ELISA Kit; L-selectin ELISA Kit; Human; selectin L; CD62L ELISA Kit; LAM1 ELISA Kit; LECAM1 ELISA Kit; LEU8 ELISA Kit; LNHR ELISA Kit; LSEL ELISA Kit; LYAM1 ELISA Kit; PLNHR ELISA Kit; TQ1 ELISA Kit; CD62L elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	For the quantitative determination of Human CD62L/L-Selectin concentration in serum.
Assay Type	Solid Phase Sandwich ELISA (quantitative)
Sample Types	Serum
Detection Range	12.5-800pg/mL
Sensitivity	2.41pg/mL
Conjugation	HRP
Materials Provided	1. 96 well microplate coated with Capture Antibody 2. Detection Antibody conjugated to HRP 3. Standards 4. Wash Buffer Concentrate 5. Dilution Buffer Concentrate 6. Color Reagent A 7. Color Reagent B 8. Stop Solution

Recombinant mouse			
SELL			

Application Data

This assay recognizes both recombinant and natural Human SELL. The factors listed below were prepared at 50ng/mL in dilution buffer and assayed for cross-reactivity. No cross-reactivity was observed.

Standard Curve (Sample)

This standard curve is only for demonstration purposes. A standard curve should be generated for each assay.

ADDITIONAL INFORMATION

Related Product Information for CD62L elisa kit	This L-selectin ELISA Kit, Human is an enzyme-linked immunosorbent assay for the quantitative measurement of Human L-selectin protein in Serum. It contains recombinant Human L-selectin, and antibodies raised against the recombinant protein. This ELISA kit is complete and ready-to-use. Background: L-selectin (SELL), also known as CD62L, is a key adhesion molecule that regulates both the migration of leukocytes at sites of inflammation and the recirculation of lymphocytes between blood and lymphoid tissues. It belongs to the selectin family of proteins, and consisting of a large, highly glycosylated, extracellular domain, a single spanning transmembrane domain and a small cytoplasmic tail. L-selectin is the only selectin expressed on leukocytes and mediates a number of leukocyte-endothelial interactions. L-selectin acts as a "homing receptor" for leukocytes to enter secondary lymphoid tissues via high endothelial venules. Ligands present on endothelial cells will bind to leukocyte expressing L-selectin, slowing leukocyte trafficking through the blood, and facilitating entry into a secondary lymphoid organ at that point. L-selectin-mediated lymphocyte recirculation is required for maintaining the appropriate tissue distribution of lymphocyte subpopulations including naïve and effector subsets such as regulatory T cells. In addition, L-selectin-mediated entry into peripheral lymph nodes is required for optimal induction of lymphocyte homeostatic proliferation during lymphopenia. Importantly, L-selectin has been shown to have both adhesive and signaling functions during leukocyte migration. L-selectin has also been shown to mediate leukocyte recruitment during chronic inflammatory and autoimmune diseases and thus is a potential therapeutic target for drug development.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
