

Rabbit anti-Human SerpinB3 Polyclonal Antibody

Anti-SerpinB3 Antibody, Rabbit Polyclonal

CATALOG # AAA259044	HOST Rabbit	REACTIVITY Human	APPLICATIONS Immunohistochemistry
-------------------------------	-----------------------	----------------------------	---

PRODUCT SYNONYMS

SerpinB3; Polyclonal Antibody; Anti-SerpinB3 Antibody; Rabbit Polyclonal; serpin peptidase inhibitor; clade B (ovalbumin); member 3; Anti-HsT1196 Antibody; Anti-SCC Antibody; Anti-SCCA-1 Antibody; Anti-SCCA-PD Antibody; Anti-SCCA1 Antibody; Anti-T4-A Antibody; anti-SerpinB3 antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Human
Clonality	Polyclonal
Isotype	Rabbit IgG
Specificity	Human SerpinB3
Purity/Purification	Protein A & Antigen Affinity
Form/Format	Liquid; 0.2um filtered solution in PBS
Applicable Applications for anti-SerpinB3 antibody	IHC (Immunohistochemistry)
Immunogen	E coli-derived Human SerpinB3 fragment
Preparation	Produced in rabbits immunized with E coli-derived Human SerpinB3 fragment, and purified by antigen affinity chromatography.
Preparation and Storage	This antibody can be stored at 2-8 degree C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20 degree C to -80 degree C. Avoid repeated freeze-thaw cycles.

IMAGES

IHC (Immunohistochemistry)

Immunochemical staining of human SerpinB3 in human bronchi with rabbit polyclonal antibody at 1:1000 dilution, formalin-fixed paraffin embedded sections.

IHC (Immunohistochemistry)

Immunochemical staining of human SerpinB3 in human esophagus with rabbit polyclonal antibody at 1:1000 dilution, formalin-fixed paraffin embedded sections.

ADDITIONAL INFORMATION

Related Product Information for anti-SerpinB3 antibody	SERPINB3, also known as SCCA-1, belongs to the serpin family. Serpins are a group of proteins with similar structures that were first identified as a set of proteins able to inhibit proteases. The acronym serpin was originally coined because many serpins inhibit chymotrypsin-like serine proteases. SERPINB3 is expressed in some hepatocellular carcinoma (at protein level). Its expression is closely related to cellular differentiation in both normal and malignant squamous cells. It seems to also be secreted in plasma by cancerous cells but at a low level. SERPINB3 significantly attenuates apoptosis by contrasting cytochrome c release from the mitochondria and by antichemotactic effect for NK cells. It may act as a protease inhibitor to modulate the host immune response against tumor cells and may be involved in the malignant behavior of squamous cell carcinoma cells.
