### PRODUCT SYNONYMS

Acetyl Lysine; Monoclonal Antibody; Anti-Acetyl Lysine Antibody; anti-Acetyl Lysine antibody

### PRODUCT SPECIFICATIONS

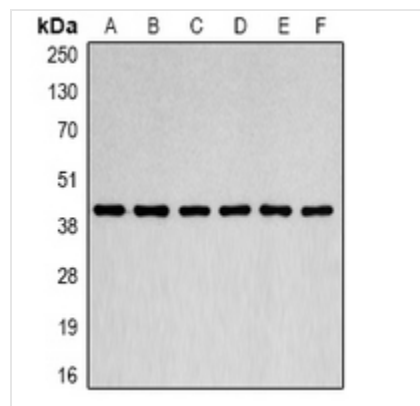

|                                                         |                                                                                                                |
|---------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| Host                                                    | Mouse                                                                                                          |
| Reactivity                                              | General                                                                                                        |
| Clonality                                               | Monoclonal                                                                                                     |
| Specificity                                             | Recognizes endogenous levels of Acetyl Lysine protein.                                                         |
| Form/Format                                             | Liquid in 0.42% Potassium Phosphate, 0.87% Sodium Chloride, pH 7.3, 30% Glycerol, and 0.01% Sodium Azide.      |
| Applicable Applications for anti-Acetyl Lysine antibody | IHC (Immunohistochemistry), WB (Western Blot)                                                                  |
| Immunogen                                               | Purified protein corresponding to Acetyl Lysine.                                                               |
| Preparation and Storage                                 | Shipped at 4 degree C. Upon delivery aliquot and store at -20 degree C for one year. Avoid freeze/thaw cycles. |

### IMAGES

#### IHC (Immunohistochemistry)

Immunohistochemical analysis of Methyl Lysine staining in human breast cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

#### WB (Western Blot)

Western blot analysis of Methyl Lysine expression in HeLa (A) whole cell lysates.

### ADDITIONAL INFORMATION

|                                                             |                                   |
