

General Glucose Assay Kit

Glucose (Serum) Microplate Assay Kit

CATALOG # AAA261563	REACTIVITY General	APPLICATIONS Functional Assay
-------------------------------	------------------------------	---

PRODUCT SYNONYMS

Glucose; Glucose (Serum) Microplate Assay Kit; Glucose assay kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This antibody recognizes human Vimentin protein. The other species was not tested.
Applicable Applications for Glucose assay kit	FA (Functional Assay)
Preparation and Storage	Shipped and store at 4 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for Glucose assay kit	Background/Introduction: Glomerular Epithelial Protein 1 (GLEPP1) is a transmembrane protein tyrosine phosphatase found only in the epithelial cells of the renal glomerulus. It is localized to the apical surface of polarized cells and may have tissue-specific functions through activation of Src family kinases. It may have multiple isoform-specific and tissue-specific functions, including the regulation of osteoclast production and activity, inhibition of cell proliferation and facilitation of apoptosis. This gene is a candidate tumor suppressor, and decreased expression of this gene has been observed in several types of cancer. GLEPP-1 is present only in visceral glomerular cells (Podocytes). The presence of GLEPP1 may be used as a marker of podocyte integrity in various forms of glomerular injury.
