ADDITIONAL INFORMATION

Related Product Information for endo-beta-Mannanase assay kit	Background: endo-beta-Mannanase (EC 3.2.1.78), also known as Mannan endo-1,4-beta-mannosidase, is an enzyme with systematic name 4-beta-D-mannan mannanohydrolase. This enzyme catalyses the following chemical reaction: Hydrolysis of (1->4)-beta-D-mannosidic linkages in mannans, galactomannans and glucomannans. This cleavage occurs at random internal sites within the chain. endo-beta-Mannanase Microplate Assay Kit is a sensitive assay for determining endo-beta-Mannanase activity in various samples. endo-beta-Mannanase hydrolyzes the mannan to generate mannose. Mannose react with 3,5-dinitrosalicylic acid to generate red-brown substance. The color intensity, measured at 540 nm, is proportionate to the enzyme activity in the sample. Principle of the Assay: 1 mmol/L - 10 mmol/L
