### PRODUCT SYNONYMS

NXN; Polyclonal Antibody; Anti-NXN Antibody; anti-NXN antibody

### PRODUCT SPECIFICATIONS

|                                               |                                                                                                                                     |
|-----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| Host                                          | Rabbit                                                                                                                              |
| Reactivity                                    | Mouse                                                                                                                               |
| Clonality                                     | Polyclonal                                                                                                                          |
| Specificity                                   | Recognizes endogenous levels of NXN protein.                                                                                        |
| Purity/Purification                           | The antibody was purified by immunogen affinity chromatography.                                                                     |
| Form/Format                                   | Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH7.3, 30% glycerol, and 0.01% sodium azide.                            |
| Applicable Applications for anti-NXN antibody | IHC (Immunohistochemistry), WB (Western Blot)                                                                                       |
| Immunogen                                     | KLH-conjugated synthetic peptide encompassing a sequence within the Central region of human NXN. The exact sequence is proprietary. |
| Preparation and Storage                       | Shipped at 4 degree C. Upon delivery aliquot and store at -20 degree C for one year. Avoid freeze/thaw cycles.                      |

### IMAGES

#### IHC (Immunohistochemistry)

Immunohistochemical analysis of NXN staining in human kidney formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

#### WB (Western Blot)

Western blot analysis of NXN expression in mouse liver (A) whole cell lysates. (Predicted band size: 48 kD; Observed band size: 55 kD)
