

# SUPAR (soluble urokinase plasminogen activator precursor) Recombinant Protein | SUPAR recombinant protein

SUPAR (Human soluble urokinase plasminogen activator receptor precursor)

|                               |                       |                                                      |
|-------------------------------|-----------------------|------------------------------------------------------|
| CATALOG #<br><b>AAA268923</b> | HOST<br><b>E Coli</b> | APPLICATIONS<br><b>Western Blot, SDS-Page, ELISA</b> |
|-------------------------------|-----------------------|------------------------------------------------------|

## PRODUCT SYNONYMS

SUPAR (soluble urokinase plasminogen activator precursor); SUPAR (Human soluble urokinase plasminogen activator receptor precursor); SUPAR recombinant protein

## PRODUCT SPECIFICATIONS

|                                                       |                                                                                                 |
|-------------------------------------------------------|-------------------------------------------------------------------------------------------------|
| Host                                                  | E Coli                                                                                          |
| Purity/Purification                                   | >90% by SDS-PAGE                                                                                |
| Form/Format                                           | The Protein solution contains 50mM Tris,300mM NaCl, 0.1%SKL, pH8.0.                             |
| Applicable Applications for SUPAR recombinant protein | WB (Western Blot), SDS-PAGE, Immunogen, Positive Control, ELISA                                 |
| Source                                                | E. Coli                                                                                         |
| Species                                               | Homo sapiens                                                                                    |
| Preparation and Storage                               | Upon receipt, aliquot and store at <-20°C for long term. Avoid repeated freeze and thaw cycles. |

## ADDITIONAL INFORMATION

|                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|-----------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for SUPAR recombinant protein | Background: PLAUR is one of 2 activators which convert the extracellular zymogen plasminogen to plasmin, a serine protease involved in a various normal and pathological processes that require cell migration and/or tissue destruction. PLAUR protein is synthesized and released from cells as a single-chain proenzyme with narrow enzymatic activity and is converted to an active two-chain disulfide-linked active enzyme by plasmin and other specific proteinases. |

## NCBI AND UNIPROT INFORMATION

|                  |                            |
|------------------|----------------------------|
| Molecular Weight | 33KD(with His Tag protein) |
|------------------|----------------------------|

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
