

Human HSPb6 (Heat Shock Protein Beta 6) ELISA Kit | HSPb6 elisa kit

Human HSPb6 (Heat Shock Protein Beta 6) ELISA Kit

CATALOG #
AAA270065

REACTIVITY
Human

PRODUCT SYNONYMS

HSPb6 (Heat Shock Protein Beta 6); Human HSPb6 (Heat Shock Protein Beta 6) ELISA Kit; HSP20; Heat Shock Protein 20 kD; Heat Shock Protein B6; Alpha Crystallin Related; Heat shock 20 kDa-like protein p20; HSPb6 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Tissue homogenates, cell lysates and other biological fluids.
Assay Type	Sandwich
Detection Range	0.79-50 ng/mL
Sensitivity	0.29 ng/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for HSPb6 elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Heat Shock Protein Beta 6(HSPb6). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Heat Shock Protein Beta 6(HSPb6). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Heat Shock Protein Beta 6(HSPb6), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Heat Shock Protein Beta 6(HSPb6) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for HSPb6 elisa kit

Infection immunity

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
