

Human GRb (Glucocorticoid Receptor Beta) ELISA Kit | GRb elisa kit

Human GRb (Glucocorticoid Receptor Beta) ELISA Kit

CATALOG #
AAA270295

REACTIVITY
Human

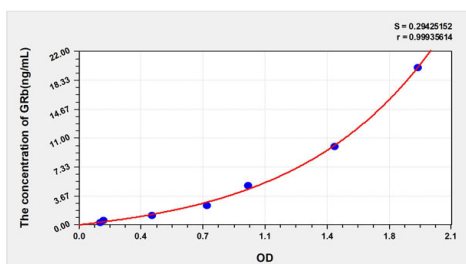

PRODUCT SYNONYMS

GRb (Glucocorticoid Receptor Beta); Human GRb (Glucocorticoid Receptor Beta) ELISA Kit; GR-B; GRb elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	tissue homogenates, cell lysates and other biological fluids
Assay Type	Sandwich
Detection Range	0.32-20 ng/mL
Sensitivity	0.123 ng/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for GRb elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Glucocorticoid Receptor Beta (GRb). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Glucocorticoid Receptor Beta (GRb). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Glucocorticoid Receptor Beta (GRb), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Glucocorticoid Receptor Beta (GRb) in the samples is then determined by comparing the OD of the samples to the standard curve.
