Mouse TAP (Trypsinogen Activation Peptide) ELISA Kit | TAP elisa kit

Mouse TAP (Trypsinogen Activation Peptide) ELISA Kit

CATALOG #	REACTIVITY
AAA270338	**Mouse**

PRODUCT SYNONYMS

TAP (Trypsinogen Activation Peptide); Mouse TAP (Trypsinogen Activation Peptide) ELISA Kit; Trypsinogen Activation Peptide; TAP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Assay Type	Competitive
Detection Range	156.25-10000 pg/mL
Sensitivity	46.4 pg/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for TAP elisa kit	Principle of the assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Trypsinogen Activation Peptide(TAP) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Trypsinogen Activation Peptide(TAP). Next,Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Trypsinogen Activation Peptide(TAP) in the samples is then determined by comparing the OD of the samples to the standard curve.
Product Categories/Family for TAP elisa kit	Infection immunity; Immune molecule; Hepatology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
